

### About Solstice Cam

The Sun Surveillance SolsticeCam is a highly versatile wireless solar powered surveillance system, that now makes it possible to locate cameras where it was previously impossible or too expensive.

The SolsticeCam is a robust system that has proven itself to be extremely reliable, even in harsh environments around the world. The SolsticeCam is manufactured with noncorrosive materials so the systems appearance will stand up to the elements as well. With the solar panels boasting up to a 25 year manufacturers warranty the system will provide you with many years of maintenance free operation.

Best of all, the SolsticeCam is completely turnkey! All components are included in the system and pre configured for a true plug and play setup that makes the SolsticeCam a snap to install. We take the headache out of the equation so that you can focus on what you do best.

## How it Works?

### Solar Powered

The Sun Surveillance SolsticeCam works virtually anywhere by converting the sun's energy into power. This removes the need to dig costly trenches for power. The system is designed to operate 24 hours a day, 365 days a year. Each system has a minimum of 5 days of battery backup with an optional 10 and 15 day backup.

### Built to Withstand Anything

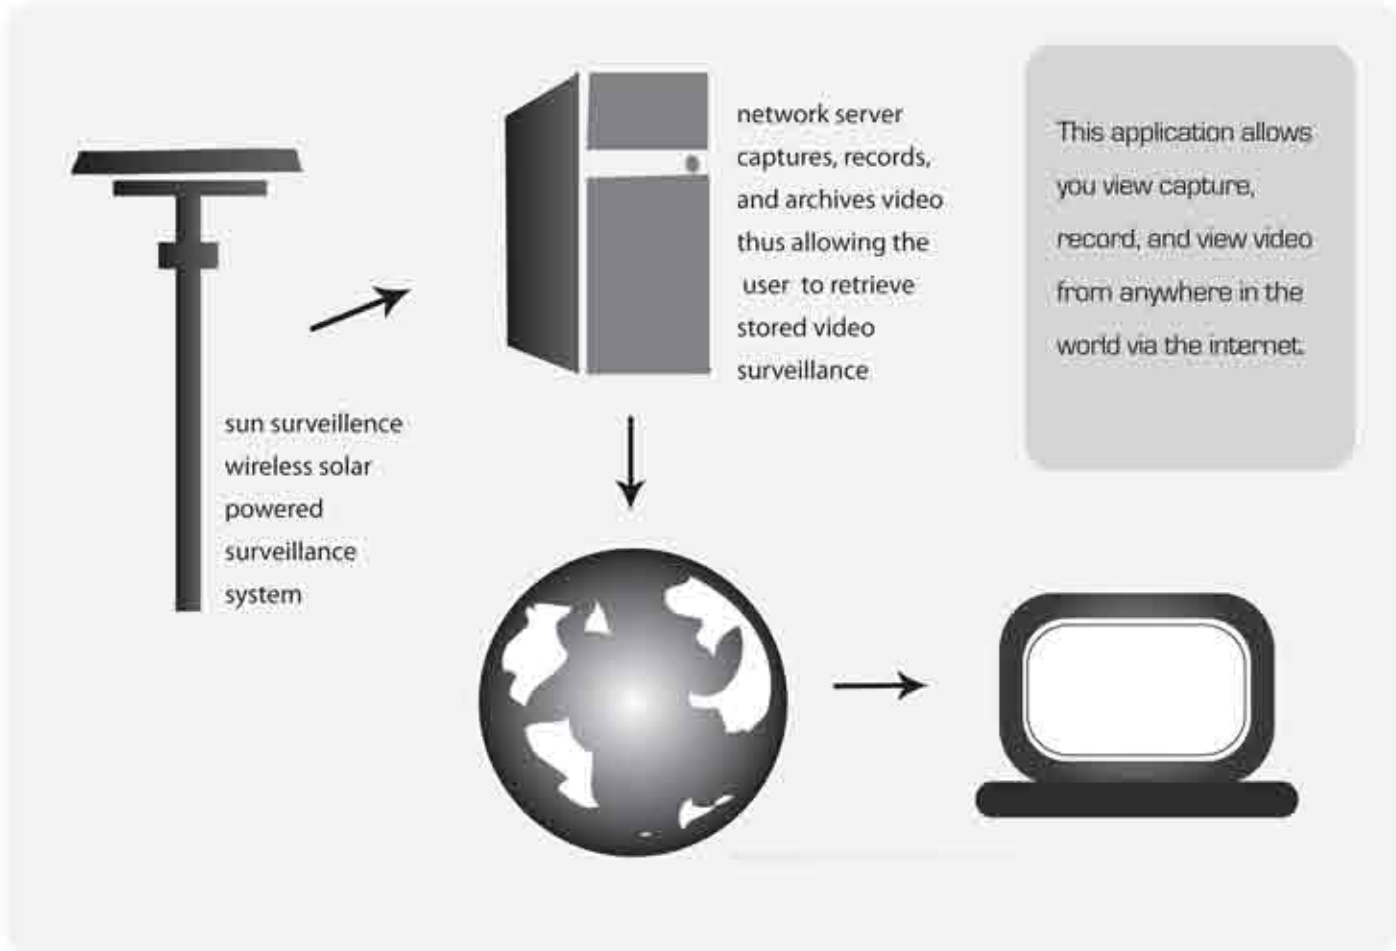

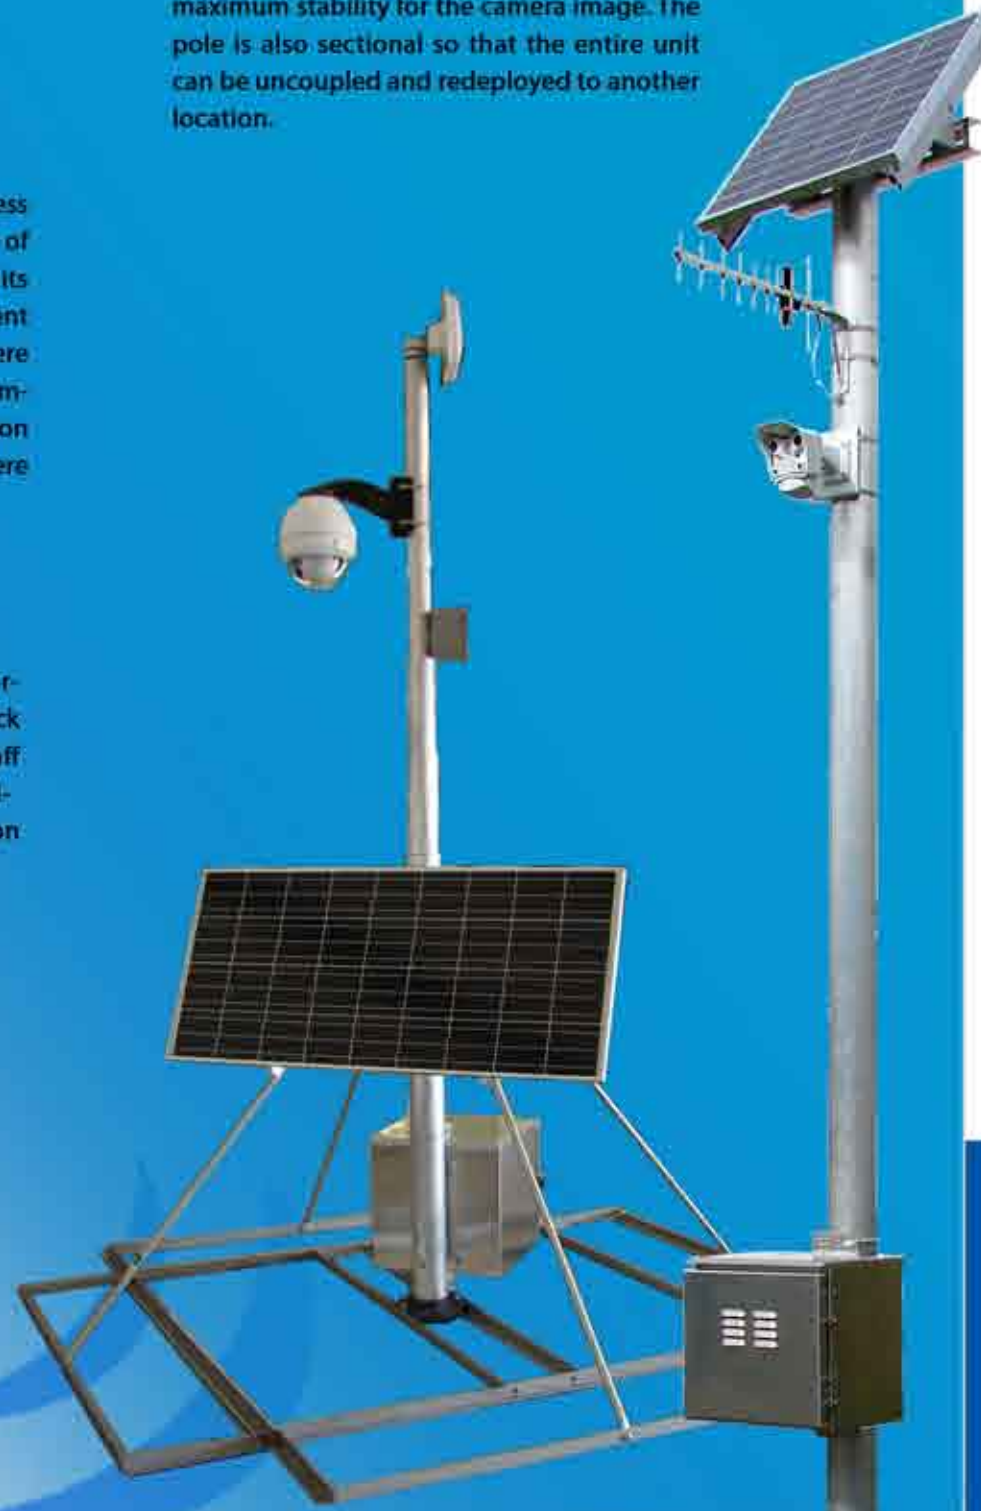

The SolsticeCam can stand up to even the most severe environments because it is built upon proven weather resistant technology. The unit is tamper proof and has an optional bullet resistant housing for PTZ cameras. The schedule 40 aluminum pole provides maximum stability for the camera image. The pole is also sectional so that the entire unit can be uncoupled and redeployed to another location.

### High Resolution Video

The Complete, fully integrated, built-in wireless system can transmit video up to 20 miles line of sight. The SolsticeCam Pan, Tilt, and Zoom units provide a 360 degree view of your environment which allows you to see what is going on anywhere around the SolsticeCam. The video is then seamlessly integrated into a secure network connection which enables you to view the live video anywhere even on a PDA.

### Real Time Video

The SolsticeCam provides relevant and timely information to security personnel allowing quick response to any incident. Additionally security staff can safely and securely monitor an event in real-time, from any city and time zone and easily on their laptop or PDA.

## What are my options?

### Cameras:

The SolsticeCam gives you many feature rich cameras to choose from. With these industry leading cameras your sure to find a system that fits your application. Options include: Analog, IP, Fixed, PTZ, from D1 resolution all the way up to an amazing 3 mega-pixel image! With optional audio and auto tracking you will have the equivalent of a full time security guard regardless of the location. Furthermore, if you don't see your favorite camera don't worry, we will work with you to build a system around your camera.

### Wireless:

In addition to camera options, we have many wireless options as well. We are confident that we have a wireless solution that will meet your most challenging application. From across the street to across the globe we keep you connected.

Point to Point	Point to Multipoint	Mesh	Cellular
900MHz	900MHz		800MHz
2.4GHz	2.4GHz	2.4GHz	1900MHz
4.9GHz	4.9GHz	4.9GHz	EV-DO Rev A
5.8GHz	5.8GHz	5.8GHz	HSDPA

## About Us

Sun Surveillance Inc. is an energetic and steadfast company founded upon solid principles, that is deeply committed to providing customers with the most reliable and affordable wireless solar powered surveillance technology through manufacturing excellence and innovation.

Sun Surveillance is the manufacturer of SolsticeCam wireless solar powered camera systems. SolsticeCam, as our customers will attest, is the most complete, robust, and affordable platform of wireless solar powered camera systems. Applying superior design, engineering and manufacturing practices with our unique combination of expertise in solar power, wireless technology and video surveillance has established Sun Surveillance as the world leader of wireless solar powered camera systems.

## Why Sun Surveillance?

### First in the Industry

Officially formed in 2003, the unyielding vision of Sun Surveillance as the world's preeminent provider of complete, stand alone wireless solar powered camera systems has revolutionized the industry. Sun Surveillance first pioneered wireless TX/RX analog camera systems, then wireless Network IP camera systems and now cellular uplink camera

### Flexible Design for Varying Applications

Sun Surveillance offers our standard lines of wireless solar powered systems which includes both analog and IP camera systems with a variety of wireless options for transmitting video. Our standard systems are offered as a complete pole structure or as a kit for installation flexibility. We provide these standard options but also enjoy providing customers with the ability to do custom systems designed for specific applications. Ask us about our OEM Program.

### Industries and Applications Served

- Construction sites
- Manufacturing facilities
- Government research facilities
- Wildlife conservation and protected areas
- Parks and recreational facilities
- Mining and Oil Industries
- Farming, ranching, and agricultural sites
- Law enforcement
